

PROFESSIONAL VALUE PROPOSITION

I am a bilingual Operations and Customer Experience Leader with experience leading teams, improving operational performance, developing talent, and driving measurable business results across customer service, commercial, and digital environments.

Throughout my career I have managed operational performance through KPI-driven decision making, structured coaching, and continuous improvement practices. My experience includes improving customer satisfaction, Net Promoter Score, adherence, quality, and operational efficiency while maintaining accountability and team engagement.

At Teleperformance, I led teams of 14–23 agents in a high-volume financial services environment, improving key performance indicators such as OSAT, NPS, adherence, AHT, quality, and operational stability. I also developed future leaders, contributing to internal promotions and strengthening team performance.

Prior to that, I managed commercial operations, client relationships, process improvement initiatives, inventory optimization, and revenue growth projects in a large distribution company serving major multinational brands.

My leadership philosophy combines accountability, coaching, early risk detection, and data-driven performance management. I believe sustainable results are achieved through clear expectations, structured support, and operational discipline.

I am seeking opportunities where I can contribute to operational excellence, customer experience, team development, performance optimization, and scalable business growth.
